SUMMARY
Frontend engineer with 4 years building web applications for e-commerce and fintech teams.

SKILLS
Languages: JavaScript, TypeScript, HTML/CSS, Python
Frameworks: React, Next.js, Redux, Node.js
Tools: Git, Docker, Jest, Storybook

EXPERIENCE
Acme Commerce — SDE II Apr 2022 – Present
• Improved checkout page performance by moving rendering to Next.js server-side rendering, cutting LCP by 38%
• Built reusable components for the internal design system used by 6 product teams
• Wrote unit tests with Jest and React Testing Library, raising coverage from 41% to 78%
• Mentored 2 junior engineers through code reviews and pairing sessions

Finlytics — Software Engineer Jul 2020 – Mar 2022
• Developed dashboards in React and Redux that visualised portfolio data for 12,000 users
• Reduced bundle size by 27% through code splitting and lazy loading
• Integrated REST APIs written in Node.js and documented them for the frontend team

PROJECTS
Seatly — Open-source booking widget
• Created a TypeScript booking widget with 300 GitHub stars and a Storybook documentation site

EDUCATION
B.Tech in Computer Science — Vellore Institute of Technology 2016 – 2020
